Shameful Illiteracy.

It will be seen from the census table in another column that Tennessee stands 37th in illiteracy in the states and territories. It is noticeable that the slave states stand last and that is the reason for it. Although it is the illiteracy of the negroes that gives us such an unenviable position in the list, yet it is asserted as a fact that the blacks are redeeming themselves faster than the whites. They are zealous in acquiring rudimentary knowledge and utilize every means they have, while the whites do not.

This ought not to be. Our white people ought to set about remedying this shameful state of affairs. A complete public school law is of more importance to Tennessee than all other questions combined which she permits to distract her. At the north, in addition to their grand system of free schools, the people universally read the papers and periodicals and every family supplies itself or is supplied with them. It ought to be so here. Men ought to find out whether their neighbors read and not whether they read. Children are being taught, or not, and they ought to argue and insist with them and show them the advantages and lead them up to a correct appreciation of the priceless boon—how many of us realize this? If we did, we would set about for the remedy more vigorously. How is it in Giles? The Citizen lists furnishes the best means of judging and you may be astonished to know that less than one-third of our voters, or one-third of our people, take the Citizen. Each community in Giles county ought to hunt out its people who are careless upon this matter and the first good they can do them is to insist that they take the Citizen, and then insist that our law-makers give us a more comprehensive school system, with compulsory provisions.

It is not a desire for gain alone that prompts us to urge the reading men of Giles to help to extend the circulation of the Citizen. We believe and know that it will contribute more than anything outside of school to the education and elevation of the non-reading people, because it pertains to matters that interest them and they will soon come to read it more closely and from that branch into other lines of knowledge. Let us set about remedying this crying evil and not permit the children of the people to grow up in the ignorance that affects their fathers. Giles is less illiterate perhaps than most counties in Tennessee, and these reflections are not unpleasant to the people, but that there are hundreds of men who cannot and do not read and are making no provision to redeem their children from their lamentable state is too apparent to be concealed, and it behooves the board of education every means to do away with a state of things that holds us back and places us in bad odor with the outside world. Induce your neighbor to take the Citizen at once.

One of our young men was aroused from sleep the other night by his room mate who, fancied to retire at a late hour. He sat up in the bed and after gazing at his companion for some time ejaculated: "By George, I thought that was me!" What could have been the matter with his friend to come him to think such a thing as we are unable even to imagine.

MURDERED A WOMAN.

A Fledgling Shot Gun into a Woman's Side.

One of the most horrible crimes ever enacted was committed just over in Alabama at the State Line, on the N. & D. railroad, last Saturday. John Bowling shot and killed Mrs. Blakely, emptying one or both barrels of a shot gun loaded with buckshot into her side. The reports as to what was the provocation are conflicting. One was that Blakely had sworn out a peace warrant against Bowling and that he became incensed thereby. Another was that the wives of the two men had had a difficulty. At any event, Bowling went there with a gun to kill Blakely, and not finding him, he got into a quarrel with the woman and shot her while she was in the act of making up the bed. Two or three little children were the only witnesses, and they alarmed the neighbors. As soon as he had killed the woman he went to an other house and left his empty gun and took another and went out into the field to hunt for Blakely. For a moment he did not find him, and then he left the country. He was heard of a few miles off where he met a man and sold him the gun for four dollars, allowing him to try it several times at a target, and accompanying him to the house to get some squirrel shot to try it with. Of course the country was aroused and vigorous pursuit was instituted, but was unsuccessful up to this writing.

The crime has no parallel, whatever the offense given by the woman and no matter what her character was. It was not very distant from a similar scene of a year or two since when a man killed his wife, and also near the scene of the terrible murder of young Grigby. It furnishes additional proof of the hellish propensity of men to imitate each other in crime. Whenever a man does a crime, it does not find of suicide it seems to awaken a desire to emulate his example and others speedily end their lives in a similar manner; and whenever a peculiarly heinous crime is perpetrated you may be sure that some other attempt will soon follow. If Bowling is caught, and he will be, the good people in that country will see to it that he meets the speedy fate so richly merited for such a cowardly crime. There is one way to stamp out such an unnatural mania and that is no mercy or quarter for such devils.

To-day is National Turkey Day. If any of our highly-respected friends are going to decorate their festive boards with this stuffed bird of liberty they have failed to acquaint us with the fact. We have sometimes imagined that in such contests it is our best bet, and we have reflected sometimes always occasionally that it might be the meanness of our gastronomic host that contributes to our success. We always feel sorry for a turkey that is left unprotected in our reach, and very sorry for the other boarders who are left to eat the stuffing right out of the enemy, and then, like the mule that pulled the gate-post by his hitch rein and turned and kicked himself to death at the bolt, we sit down, Alexander-like, and weep over the sacker's deed. We didn't intend to grow so pathetic, but simply to say that if any dear friend is going to have turkey to-day he will permit us to come and sit out on their back fence and gobble.

They had come to town to attend Forepaugh's show and upon returning home in the evening found that the house had been broken open and the contents of the jewelry and clothing to the amount of several hundred dollars. Mr. Ray said but little about the matter further than to give the facts to the officers of the law, who have since kept a sharp lookout for the robber. The law have been unable to learn anything definite until within the last few days Mr. Jno. Arch Richardson saw a negro boy wearing a gold watch which he recognized as one of the pieces of stolen goods. The boy said it was a present to his sister from her sweetheart, Alfred Pettus. With this clue Mr. Flippin went to work to recover the rest of the property. He arrested Pettus last Monday and secured a third of several miles in the country on last Thursday and captured him in the woods. Will Brunson, colored, whom Gibson & Abernathy had employed as porter for their store, was discovered by a pair of their hounds, and for which they had received no pay. Finding that his theft had been detected he fled and was pursued. Mr. Gibson caught him after a foot race of about a mile, but he refused at first to surrender and made a dash for it. Mr. Gibson for a moment was named and knew the negro could easily whip him, but he pretended to have a pistol, and scared him into submission by threats, and brought him back and put him in jail. The felon will have to wear out his shoe leather working in the chain gang.

The Cheap Cash Store. Is the place to get bargains in queensware, glassware and groceries. KIRKSEY & ARROWSMITH.

The best authority calls for a rise in wheat at an early day. Those having a surplus yet remaining had better watch the markets and learn the usual course of the price. For fifteen years the average price has been higher late in the season. The larger the crop, the better the prices, averaging up higher as the season advances. This year can scarcely be an exception, but it may be.

Thornton's Cough Cure or Compound Syrup of Tar and Wild Cherry for coughs, colds and bronchitis, gives relief every time. Excellent in incipient consumption.

Negotiations are pending to have the M. E. church lit with gas. It ought to be done. It seems to us that such places ought to be made as attractive as possible so as to be inviting to the public. If a stranger were to step out of our brilliantly lighted stores and start into the church, the dim, dark-looking prospect would necessarily repel him. The Presbyterian church is already piped and the others ought to be.

SKINNY MEN. "Wells' Health Renewer" restores health and vigor, cures dyspepsia, impotence, sexual debility, etc.

Our Mr. J. L. Peary is an applicant for one of the three principal appointive offices to be filled by Gov. Bate. He will have the unqualified endorsement of his entire constituency as a testimony of his fitness and faithfulness to duty, and coupled with his excellent ability to administer an office of responsibility and clerical intricacies, he stands in a deserving attitude before his party by reason of his unremitting and telling work for the party in both the recent canvass and the one preceding. No man ever occupied a political mine in Giles half so assiduously and effectively as he did the one of '80, and in the recent canvass he rendered invaluable services at home and in his capacity as one of those citizens known as Gov. Bate will do a handsome thing in recognizing these matters in his appointment.

Never try to raise a family without a good newspaper, provided it contains the advertisement of Dr. Bull's Cough Syrup; for this valuable medicine is necessary to keep your children in good health.
